

# Network Technician

## Asset Engineer

Salary: £25,005 - £29,531

Location: South Wales

### Who we are

When you think about it, water is the most basic human need. So what we do at Welsh Water is incredibly important – we give three million customers safe, clean water, take away their dirty water and help to protect our beautiful environment.

It's an awesome responsibility, and we have to earn our customers' trust every single day. Being the only not-for-profit company in the water industry is certainly a good start. Every single penny we make goes back into looking after their water and environment, rather than going to the pockets of shareholders.

Water Assets are responsible for assessing the risk associated with the water infrastructure and non-infrastructure assets and ensuring investment is effectively prioritised helping to safeguard Welsh Water's ability to provide a great service.

### What you will do

You will work closely with the Asset Engineer, Risk Team and Operational Team to ensure the progression of identified risk through the gateway process. This will include making sure essential root cause analysis has taken place to allow the right solutions to be developed. You will be the key personnel in maintaining and improving the data held within the corporate investment tool i.e. Investment Manager which will be critical to the development of future asset investment strategies.

A current full driving licence will be required to drive to locations across the region. Willingness to participate in standby is also essential for this role.

### What we offer

We know that if our employees are happy, our customers are happy. That's why we offer a great benefits package. As one of the biggest companies in Wales, our reward and benefits package includes:

- ◆ Generous Pension Plan
- ◆ 25 days annual leave plus public holidays
- ◆ Training Provided
- ◆ Colleague Reward Scheme (Bonus)
- ◆ Childcare Voucher Scheme
